Subject Index

Key: a = Abstract, br = Book Review, c = Correspondence, r = Review

Abstracts - EASD - Oslo 135
 Acetylator phenotype, fast - and ABO blood groups - CPAF 187 a
 Acute effect of insulin on cardiovascular function 377 r
 Acute myocardial infarction - significance of hyperglycaemia 184 a
 Adrenaline - and recovery from hypoglycaemia in Type 1 diabetes 150 a
 - anti-ketogenic in fasted rat 138 a
 - effect on ketone body kinetics 203 a
 - inhibition of insulin release and cyclic AMP 199 a
 Adrenergic blockade - glucose induced thermogenesis 194 a
 - glucagon, insulin and glucose levels 171 a
 Aerobic capacity - glycaemic control and lipoprotein 159 a
 Albumin - glomerular permeability - Type 2 diabetes 149 a
 Albumin, transcapillary escape rate - metabolic control, hypertension 260
 Alcohol consumption and diabetic retinopathy - 206 a
 Aldose reductase - activity in islet cells 152 a
 - axonal transport - conduction velocity 433
 Amino-oxyacetate - and ionic movements - islet cells 163 a
 Amyloidosis - absence in dogs treated with long-term insulin pump 488
 Anhydroglucitol - reduction in diabetic patients 136 a
 Anti-insulin antibodies - Type 1 diabetes 136 a
 Anti-insulin serum - action on insulin metabolism 195 a
 Antibodies, insulin binding - human insulin action - Type 1 diabetes 158 a
 Antibody response - following change to mixed species 151 a
 Apo A-1 gene - polymorphism in hypertriglyceridaemia 189 a
 Aprotinin - effect on insulin absorption 175 a
 Asymptomatic hyperglycaemia - men born in 1913 174 a

Atherosclerosis - and diabetes in sand rats 179 a
 - risk factors with impaired glucose tolerance 200 a
 ATP, erythrocyte - effect of insulin 137 a
 Atropine - and insulin levels in fa/fa rats 190 a
 Autonomic neuropathy, diabetic - a new simple test 139 a
 - ano-rectal manometry 146 a
 - counter-regulatory hormones 203 a
 - CSII 155 a
 - five cardiovascular tests 154 a
 - gastroparesis and clinical neuropathy 140 a
 - gastroparesis and surgery 160 a
 - noradrenaline tilt table response 140 a
 - response to Tyramine and noradrenaline 193 a
 - sympathetic nerve failure 73 r
 B cell function - intensified insulin treatment - Type 1 diabetes 177 a
 B cell line RINm5F - disturbed metabolism of glucose 190 a
 Bacitracin - effects on hepatocyte metabolism 135 a
 β -thromboglobulin - aggregates in diabetic patients 189 a
 Biostat - continuous glucose analyser without extra venous catheter 120
 Biosynthesis of enteroglucagon in the gut 178 a
 Blood flow - pancreatic islets - glucose stimulation - rat 45
 - skeletal muscle and subcutaneous tissue - microangiopathy 486
 C-peptide secretion - non-steady rates in dog 182 a 288
 C-terminal specific glucagon antibodies - after synthesis of antigen 173 a
 Caesarean section - increasing in diabetic pregnancies 150 a
 Calcium efflux - immediate inhibition by corticosterone 141 a

Calcium metabolism - efflux from cloned rat insulinoma cells 135 a
 Calcium transport - insulinoma microsomes 187 a
 Calcium uptake, myocardial - β -adrenergic desensitization 158 a
 Calcium, intracellular - short and long-term action of glucose 140 a
 Calmodulin - protein phosphorylation - mouse islets 198 a
 Continuous ambulatory peritoneal dialysis - and insulin resistance 162 a
 Carbohydrate tolerance - effect of meal size, timing, and sequence 316
 - hepatic insulin extraction - serial GTT 168 a
 Cardiovascular system - acute effect of insulin 377 r
 Cataracts, diabetic - increased glycosylation of lens protein 36
 Cationic modification - intracellular calcium changes 154 a
 Childhood diabetes in Tokyo and Oslo 135 a
 Chlorpropamide-alcohol flush - see CPAF
 Chronic persistent hepatitis - secretion / hepatic removal of insulin 145 a
 Chylomicrons - disposal in diabetic rats 139 a
 Ciglitazone - a new hypoglycaemic agent 514
 Cirrhosis - levels of true insulin, C-peptide, and proinsulin 506
 - portal flow and insulin resistance 186 a
 Clinics in endocrinology and metabolism 454 br
 Connective tissue proteins - lysosomal enzymes in experimental diabetes 66
 Continuous subcutaneous insulin infusion - see CSII
 Coronary artery disease - and control of diabetes - 5 year study 169 a
 Cortisol - changes after improved metabolic control 195 a
 Counter-regulation, glucose - post-hypoglycaemic hyperglycaemia 156 a
 CPAF - comparison of single challenge and 14 day test 204 a

- evaluation of study methods in Type 2 diabetes 168 a
- CSII - peripheral nerve function 194 a
- 2-h nocturnal interruption 192 a
- and concentration of insulin used 147 a
- and glucose counter-regulation 188 a
- and minimal improved B cell function 153 a
- and phase I in Type 1 diabetic children 149 a
- and physical training - insulin sensitivity 172 a
- autonomic and peripheral neuropathy 155 a
- cardiovascular autonomic neuropathy 191 a
- initiation of outpatient treatment 171 a
- metabolic control in Type 1 diabetes 179 a
- normalisation of magnesium metabolism 195 a
- post-receptor defects - Type 1 diabetes 185 a
- tight metabolic control and obstetric complications 200 a
- with closed loop glycaemic control 170 a
- Cyclic AMP - and jump gap formation 166 a
- insulin resistance - rat adipocyte 170 a
- regulation of formation 192 a
- stimulus-secretion coupling - mouse 163 a
- Cytotoxic agents - protective mechanisms of B cells 186 a
- C-peptide - and islet cell antibodies in newly diagnosed Type 1 diabetes 186 a
- Dawn phenomenon - CSII in Type 1 diabetes 148 a
- Dextrostix - extending range of measurement with reflectance meter 123
- Diabetes mellitus in Denmark 226, 231
- Diabetes mellitus; theory and practice 453 br
- Diabetes: a practical new guide to healthy living 208 br
- Diabetic education - systematic course 178 a
- teaching diet 'live' over lunch 180 a
- teaching in two university hospitals 182 a
- Diabetogenic action of alloxan-like compounds 360
- 'Diadata' - evaluation of system 149 a
- Diagnostic criteria - 451 c
- Diet, high fibre - improved long-term diabetic control 200 a
- Dietary fibre and poorly controlled diabetes 178 a
- Dietary fibre intake, high - plasma glucose and pregnancy 238
- Dimethyl urea - protection against hyperglycaemia but not insulinitis 191 a
- Distensibility of foot veins in diabetic patients 184 a
- DNA repair synthesis - effect of streptozotocin and alloxan 444
- EASD - Minutes of 18th Assembly - Budapest 129
- Education - evaluation of a video cassette programme 203 a
- results after 3 years 169 a
- Type 1 diabetes and improved control for 22 months 470
- Electronic whole blood platelet aggregation measurement in diabetes 168 a
- Entero-insulin axis - and high fat intake 161 a
- Epidemiology - Denmark - clinical characteristics - male diabetics 226
- Denmark - insulin-treated diabetes 231
- diabetes in Ethiopia 222
- diabetes mellitus in Kuwait 306
- genetics of diabetes in Nauru - 13
- glucose tolerance and smoking - Sweden 87
- mortality and causes of death in diabetes - Japan 309
- mortality from diabetic nephropathy in UK 26
- national diabetes programme in Malta 135 a
- nephropathy and Type 1 diabetes 496
- prevalence of diabetes with maternal age - Pittsburgh 82
- two contrasting presentations of Type 1 diabetes 89
- Erythrocyte deformability - cholesterol and red cell membrane 141 a
- Exercise - and activation of kallikrein-kinin prostaglandins 202 a
- alcohol - insulin need and glucose homeostasis 187 a
- glomerular permeability - Type 2 diabetes 149 a
- relationship to platelet aggregation ratios 146 a
- triglyceridaemia, and glucose tolerance in obese subjects 375 c
- Experimental diabetes - and A, B, and D insensitivity 164 a
- islet cell antibody - rat 56
- lysosomal enzymes - connective tissue 66
- mutant RT1^{uv} haplotype 171 a
- Fasting - availability gluconeogenic substrate - gestation 164 a
- Fetal pancreas, human - quantitative morphology of endocrine cells 25
- Fibronectin - and factor VIII - diabetics with atherosclerosis 167 a
- Finland - coronary artery disease and Type 2 diabetes 174 a
- Forearm oxygen uptake - and glucose loading 167 a
- Free inositol, sorbitol and fructose levels in sciatic nerve 452 c
- Fructokinase, mucosal - regulation in small intestine - rat 355
- Gastrin releasing peptide - nerves and pancreatic endocrine secretion 165 a
- Genetic obesity - non-insulin-dependent diabetes - rat 51
- Gestational diabetes - glycosylated haemoglobin and birthweight 152 a
- maternal control and neonatal complications 153 a
- GIP - failure of fasting to influence response 372
- insulin responses - obese man 386
- normalization of secretion after a meal 173 a
- Glicazide - metabolic action 138 a
- Glicentin - role of kidney in removal 176 a
- Glipizide - long-term effects on endocrine pancreas in Type 2 diabetes 193 a
- Gliquidone - extrapancreatic action 190 a
- Glomerulo-tubular balance - in Type 1 diabetes 143 a
- Glomerulopathy, diabetic - is there a distribution within the kidney? 165 a
- Glucagon - absorbed through the nasal mucosa 136 a
- degradation by human mononuclear cells 404
- level after pancreatectomy in man 396
- lipolytic action on human adipose cells 172 a
- physiology 1 r
- response to blood glucose in pancreatolitheasis - dog 510
- Glucagon deficiency - polyglandular failure with Type 1 diabetes 336
- Glucagon physiology and aging 1 r
- Glucagon secretion - regulation by L-glutamine 184 a
- Glucokinase - activity in two inbred mouse strains 114
- discriminator between glucose and mannose anomers 179 a
- Glucoregulation - adrenaline and cortisol - dog 156 a
- Glucose - effect on intracellular pH - pancreatic islets 175 a
- stimulation of blood flow in rat islets 45
- Glucose disposal - insulin secretion and resistance 157 a
- Glucose hyper-responsiveness - Zucker obese rats 175 a
- Glucose ingestion - Type 2 diabetes 154 a
- Glucose load - independence from insulin glycolytic effects 180 a
- Glucose metabolism - peripheral normo-insulinaemia - dog 411
- Glucose oxidation - and somatostatin-induced insulinopenia 325
- Glucose production - meal related contribution - CSII 186 a
- evanescent action of glucagon 172 a
- Glucose tolerance - and smoking - men 86
- impairment transmitted to subsequent generations 135 a
- Glucose tolerance test - see GTT
- Glucose transport - dysregulation - heart - obese mice 525
- using D-glucose - adipocyte 206 a
- Glucose uptake - involvement of glucose - adipocyte 201 a
- Glucose utilization - Type 1 diabetes and insulin resistance 331
- Glycosylalbumin - molecular basis for cationization 145 a
- Glycosylated fibrinogen - normal and diabetic subjects 177 a
- Glycosylated haemoglobin - and plasma glucose in a diabetic clinic 170 a
- cord blood - normal and diabetic patients 482
- kinetics of formation 182 a
- maternal and cord blood 477
- pregnancy - two methodologies 205 a
- reversible fraction in Type 2 diabetes 313
- Granular calcium content - regulation by intracellular sodium 205 a

- Granule specific proteinases, affinity labelling, lysosome, insulinoma 151 a
- Growth hormone, human – binding to adipocytes 203 a
- synthetic fragments and glucose metabolism 191 a
- Growth peptides – for human vascular cells – Type 2 diabetes 172 a
- GTT – 75 g and splanchnic metabolism – normal man 489
- intravenous – group 2 elements in Type 2 diabetes 165 a
- HB 699 – and glibenclamide – islet function 183 a
- HDL – and protein concentration in Type 2 diabetes 177 a
- basal B cell secretion in Type 2 diabetes 178 a
 - inverse relationship with insulin 206 a
- Heart rate, vagal – evaluation of tests and other complications 204 a
- Hepatic responsiveness to insulin – dog 148 a
- Hexose transport – calcium effect on insulin stimulation 157 a
- High density lipoprotein – see HDL
- HI (PHI) – a novel peptide – rat islet 153 a
- HLA – antigens in Bucharest 181 a
- diabetes in Nauru 13
 - genomic sequences in a genetic analysis – Type 1 diabetes 184 a
 - Haplotype factors for both Type 1 and 2 diabetes 71 c
 - hyperglycaemia and proliferative retinopathy 188 a
 - islet cell and cytotoxic antibody in Type 1 diabetes 202 a
 - neuropathy 542 c
- Human insulin: much ado about amino acid? 457 r
- Hypercapnia – and impaired cerebrovascular response 158 a
- Hyperglycaemic hyperosmolar non-ketotic coma in a non-diabetic child 531 c
- Hypertriglyceridaemia – carbohydrate induced – rat 201 a
- Hypoglycaemia – and haemodynamic changes 164 a
- C-peptide, cortisol and growth hormone response 180 a
 - humoral responses after optimised glycaemic control 176 a
 - idiopathic reactive – oral GTT in 148 a
- Hypoglycaemia, neonatal – deficiency of D cells – hyperactive B cells 188 a
- Hypoglycaemia, severe – after intensified teaching 171 a
- Hypoglycaemic disorders; pathogenesis, diagnosis and treatment 453 br
- Hypotensive effect – low sodium – low-fat high-fibre diet 151 a
- Hypothermia – relationship to insulin secretion 145 a
- IgG antibody, circulating – in protamine insulin – taking diabetics 322
- stimulates adipocyte lipogenesis 264
 - effect on methyl glucose uptake – rat adipocyte 170 a
- Immune intervention – newly diagnosed Type 1 diabetes 158 a
- Immunogenicity of recombinant human insulin 465
- Immunotherapy – and experimental diabetes – mice 170 a
- Incipient nephropathy – Type 1 diabetes 168 a
- Infection, intercurrent – and diabetic control 138 a
- Insulin – intraperitoneal versus intravenous – prandial glycaemia 152 a
- Insulin absorption – influence of subcutaneous adiposity 141 a
- Insulin action – impairment after acute cortisol excess 147 a
- Insulin adsorption – from dialysate during peritoneal dialysis 204 a
- Insulin allergy – treated with semi-synthetic human insulin 144 a
- Insulin antibodies – intracellular muscle and aorta metabolism 153 a
- specific site iodination 189 a
- Insulin binding – human and porcine insulin – Type 1 diabetes 235
- hyper- and hypothyroidism 184 a
 - insulin sensitivity in brittle diabetes 198 a
 - pancreatic cells – fa/fa rats 201 a
 - sex associated differences 159 a
 - visualization and internalization 199 a
- Insulin binding, hepatocyte – somatomammotrophic tumours 60
- Insulin clamp – glucagon physiology 1 r
- Insulin degradation – effect of sulphonylurea in vitro 148 a
- inhibition by insulin-like growth factors 181 a
 - saturability in normal and diabetic man 198 a
- Insulin delivery – basal state is an 'on-off' phenomenon 180 a
- Insulin dose – do antibodies matter? 155 a
- Insulin dose response curves – insulin suppression test – clamp 163 a
- Insulin gene – DNA insertion sequences and MODY 18
- linked polymorphism – diabetes in Nauru 13
 - polymorphism in diabetic hypertriglyceridaemia 168 a
- Insulin infusion – free insulin and glucose utilization 173 a
- implanted device for Type 1 diabetics 78
 - kinetics and subcutaneous blood flow 164 a
 - long-term safety 167 a
- Insulin-like growth factor – and rat heart contractility 142 a
- effects in hypophysectomized rats 206 a
- Insulin receptor – and Tyrosine protein kinase 201 a
- hepatocyte – metformin 108
 - phosphorylation and receptor kinase 162 a
 - post-receptor defects – pregnant women 164 a
- Insulin receptor kinase – human erythrocytes 158 a
- Insulin resistance – and insulin secretion in Type 2 diabetes 146 a
- cirrhosis – glucose clamp 145 a
 - constant infusion of glucose model assessment 165 a
- Mendenhall syndrome 8
 - pyruvate kinase – ob/ob mice 139 a
 - reversal after insulin treatment – dog 273
 - Zucker rat – cardiocyte 152 a
- Insulin response – analysis with photoreactive analogues 193 a
- Insulin secretion – cephalic – obese fa/fa rats 166 a
- and glucokinase activity 157 a
 - and sensitivity and duration of Type 2 diabetes 159 a
 - exocytosis – islets of Langerhans 205 a
 - hepatic extraction – obesity 147 a
 - mouse fibroblast interferon 190 a
 - poor evidence for direct feedback 139 a
 - stimulation by hypothalamic factor in rat 141 a
- Insulin secretory granule – influence of staining and fixation 183 a
- protein kinase and phosphorylation 143 a
- Insulin sensitivity – and physical exercise in Type 2 diabetes 199 a
- impairment by alcohol in normal subjects 199 a
 - increased with high aerobic power and females 206 a
 - in starvation 141 a
 - newly discovered Type 2 diabetics 184 a
- Insulin sensitivity index – intravenous GTT and glucose clamp 185 a
- Insulin syringes – differing quality 194 a
- Insulin treatment – a non-stop revolution 209 r
- Insulin 'free' – measurement, temperature and storage 161 a
- Insulin, human allergic reactions 136 a
- and porcine – glucose control and insulin requirement 185 a
 - animal insulin allergy 154 a
 - biosynthetic versus bovine in man – glucose clamp 146 a
 - crystal structure of three non-pancreatic types 460
 - immunogenicity 465
 - immunogenicity in man 192 a
 - inhibition of insulin and glucose secretion 188 a
 - moniodoinsulin tracers 162 a
 - 12 month therapy – multicentre trial 140 a
 - 2-year follow up 166 a
 - ultralente – 165 a
 - versus porcine with prolonged hypoglycaemic clamp 148 a
 - new Type 1 diabetic subjects 138 a
 - zinc suspension – pharmacokinetics 155 a
- Insulin, intraperitoneal – Type 1 diabetes 189 a
- compared with CSII 193 a
 - in brittle diabetes 179 a
- Insulin-like growth factors – stimulate glycogen synthesis 204 a
- Insulin, neutral – stability of solutions 143 a
- Insulin-receptor complex – isolated hepatocytes 169 a
- Insulin, tritiated – pharmacokinetics 149 a
- Insulinitis – and immunological phenomena 142 a
- Intermediary metabolites – normalised by insulin and glucagon 150 a
- Intravenous GTT – lipid metabolites – trace elements 205 a

- Islet cell antibody – in frozen sections of pancreas 93
 – and C-peptide levels in first 2 years of diabetes 179a
 – appearance and disappearance – Type 1 diabetes 195a
 – diabetic BB Wistar rats 56
 Islet cell cytoplasmic antibody – time-course in childhood diabetes 144a
 Islet cell surface antibody – BB rat 138a
 – produced from rat hybridoma 144a
 Islet-killing mechanisms, immune – Type 1 diabetes – rabbit model 348
 Islet-like structures – three dimensional method 181a
 Islet thiols – relationship to calcium uptake 136a
 Islets, pancreatic – and glucose stimulated blood flow 45
 – encephalomyocarditis virus and morphology 39
 – temporal changes in composition – mice 439
- Joint limitation – subclinical measurement 175a
- Ketoacidosis – occurring before and after age 60 years 166a
 – platelet behaviour and adenosine diphosphate 189a
 – survival probability 140a
 Ketogenic capacity, liver – direct effect of insulin 156a
 Ketone bodies – production and disposal 137a
 Kidney size and glomerular filtration rate – Type 1 diabetes 530c
- L-asparagine – metabolic and secretory interaction – pancreatic islets 178a
 Lactation – adaption of glucose metabolism in rat 145a
 Left ventricular ejection fraction – Type 1 diabetes 162a
 Left ventricular function – and diabetic cardiomyopathy 183ac
 – asymptomatic abnormalities in diabetes 137a
 – during submaximal effort test 141a
 – new Type 2 diabetes 199a
 Lens protein – increased glycosylation in diabetes 36
 Leoprene – pancreatic pathology after intraductal injection 97
 Leucine – and whole body proteolysis in man 162a
 Lipids and free radical attack in Type 1 diabetes 150a
 Lipogenesis, adipocyte – insulin-like stimulatory activity 165a
 Lipoprotein lipase – insulin – man 183a
 Long-standing diabetes mellitus in Ethiopia 222
 Low density lipoprotein – enhanced electrophoretic mobility in diabetes 195a
 Lymphocyte subsets – 1 year follow up in susceptible relatives 187a
 Lymphocyte transfusion – prevent diabetes in biobreeding 182a
- Mass isolation of islets from rat islets 174a
 Maturity onset diabetes of young people – see MODY
 MCHP – pharmacological and biochemical evaluation 173a
 Medial arterial calcification – feet – diabetes – amyloidosis 176a
 Mendenhall syndrome – A and B cell hyperfunction 8
 Metabolic control – glycohaemoglobins and glycosylated proteins 167a
 – strict – kidney function – Type 1 diabetes 191a
 Metformin – glucose disposal and production – insulin glucose clamp 184a
 – insulin receptor binding – hepatocyte 108
 Microalbuminuria – corrected hyperglycaemia 202a
 – predicts proteinuria – Type 2 diabetes 181a
 Microangiopathy, diabetic – vascular and endothelial response 21, 160a
 Mitochondria – alloxan effects on 142a
 MODY – and DNA insulin gene insertion sequence 18
 Monensin – effect on ion handling and insulin secretion 194a
 Monoclonal antibodies – islet cell surface antibody 137a
 – to insulin secretory granule membrane 159a
 Monoiodinated insulin tracers – purification and isolation 203a
 Mortality, diabetic – and evaluation of diabetic care 190a
 – international trends 155a
- NAD/NADH effect of glucose on cytosolic ratios 163a
 Nauru – 5-year glucose intolerance follow up 170a
 Non-esterified fatty acid – fasting – leucine carbon flux and oxidation 198a
 Neonatal diabetes – rat – insulin and glucagon secretion 187a
 Nephropathy, diabetic – aggressive anti-hypertensive treatment 185a
 – and anti-hypertensive treatment 147a
 – CSII 200a
 – early detection of 143a
 – mortality in UK 26
 – Type 1 diabetes – epidemiology 496
 – urinary glycosylalbumin 156a
 Nerve function, peripheral – limited joint function – Type 1 diabetes 139a
 – myo-inositol and aldose reductase inhibition 433
 Neuropathy, diabetic – Type 1 diabetes – CSII 182a
 Noradrenaline – and lipolysis in human adipocytes 161a
 Nursing habits – and aetiology of insulin-dependent diabetes 142a
- Obesity – and arterial hypertension in diabetics without nephropathy 153a
 – selective insulin resistance 161a
 Oestradiol – insulin stimulated gluco-regulatory enzymes 188a
 Organ specific autoantibodies – families of Type 1 diabetes 160a
- Ovarian-adrenal axis – after oestradiol treatment – rat 153a
 Oxygen tension, transcutaneous – vascular response in Type 1 diabetes 340
- Pain threshold – tingling in lower limbs – and neuropathy 186a
 Pancreas, artificial – rapid glucose insulin kinetics 189a
 – wearable – with needle type glucose sensor 194a
 Pancreas, endocrine – immunocytochemical morphometry in Type 2 diabetes 171a
 Pancreatic A cells – evidence for adenosine receptors 177a
 Pancreatic enzyme release – action of glucose and insulin 144a
 Pancreatic islet transplant – in non-immunosuppressed mice 204a
 – metabolic changes – genetic background 269
 – neoprene 97
 Pancreatic polypeptide – and antibodies in Type 1 diabetes 206a
 – effect of insulin and glucose on secretion 147a
 – idiopathic haemochromatosis 174a
 Pancreatitis, acute – C-peptide-like substances 169a
 Penis – pathology in long-term diabetic rat 424
 Pentamidine – a new diabetogenic drug – rat 418
 Peptide histidine-isoleucine – human, dog, rat and guinea pig pancreas 125
 Peripheral neuropathy, diabetic – ganglioside treatment 148a
 Phenformin – insulin binding parameters – Type 2 diabetes 155a
 Phosphatidylcholine release – and lung deflation stability 177a
 Phosphatidylinositol cycle – and cholinergic secretagogues 140a
 Phospholipids and islet function 299
 Phosphorylation, glucose – limiting step – hypophysectomized rats 139a
 Phosphorylation, protein – phospholipid turnover – rat 152a
 Photometer, glucose – and diabetics with poor vision 191a
 Physical activity – and glucose intolerance 190a
 Placenta, rat – fetal hypoinsulinaemia and glycogen metabolism 138a
 Platelet adhesiveness – and diabetic microangiopathy 21
 Platelet aggregability – relation to serum lipid and fatty acid 382
 – risk factor in diabetes 136a, 168a
 Portal blood – pancreatic hormones – rat 163a
 Prediabetes in the diabetic BB Wistar rat 142a
 Pregnancy – high dietary fibre intake 238
 – β cell replication – rat 160a
 – effect of changing policy 162a
 – pre- and post-conceptual metabolic control 173a
 Proinsulin – degradation in B cells 161a
 Proinsulin, human – biological activity compared to insulin 192a

- Prostaglandin E – and biphasic insulin pattern 157 a
 – and insulin secretion 158 a
 Protein kinase – calcium and phospholipid dependent – B cells 176 a
 Protein metabolism – poor diabetic control and obesity 400
 Protein synthesis – corticoid-glucagon interaction 137 a
 Proteolysis – inhibition by internalised insulin 151 a
 Pumps see also CSII
 – implanted – results on neuropathy and retinopathy – 173 a
 – peritoneal – circadian and circannual insulin requirements 181 a
 Pyruvate dehydrogenase – calcium and insulin activation 150 a
- Rat embryos** – effect of glucose 291
Reagent strips – and reflectance meters 200 a
Red cell sorbitol – Type 1 diabetes 187 a
Regulation of insulin release from pancreatic islets 193 a
Renal enlargement – ³H-thymidine uptake – diabetic rat 280
Renal function – size and diabetic control 205 a
Renin – impaired regulation in microvascular disease – Type 1 diabetes 152 a
Residual B cell function – Type 1 diabetes 298 c
 – Type 2 diabetes – diet 144 a
Resistance to autoimmune diabetes – nature of 175 a
Retinopathy, diabetic – and control in Type 2 diabetes 172 a
 – fibronectin levels raised in 193 a
 – glycaemia – Type 2 diabetes 164 a
 – and high blood pressure 176 a
 – effect of near-normal blood glucose 174 a
 – mild, and near-normal glycaemic control 146 a
- Soluble immune complexes** – coagulation factors – retinopathy 151 a
Somatostatin – adrenergic and cholinergic modulation – rat 179 a
 – effect of collagenase – fresh islets 166 a
 – lipolytic action in human adipocytes 194 a
 – metabolic effects after nasal use 149 a
 – response to glucose in non-insulin-dependent diabetes 159 a
 – response to mixed meal 159 a
Somatostatin release – effect of insulin 192 a
Somatomammotrophic tumours – insulin binding 60
Sorbitol – marker of diabetic control in pregnancy 157 a
Starvation – and lipid classes 161 a
Stress hyperglycaemia – during acute myocardial infarction, a myth 166 a
Stroke related factors – in normotensive diabetic subjects 167 a
Sulphonylureas – and binding to artificial phospholipid layer 150 a
 – and Type 1 diabetes 186 a
 – do not improve insulin sensitivity in Type 1 diabetes 182 a
Sympathetic nerve failure in diabetes 73 r
Sympathetic nervous activity – oral glucose – Type 1 diabetes 242
Systolic time intervals in Type 1 diabetes during exercise 532 c
- T cells** – and soluble immune complexes – microangiopathy 207 a
T lymphocyte subsets – newly diagnosed Type 1 diabetes 247
T-lymphocytes – specificity for pancreatic islets 172 a
The dawn phenomenon – insulin deficiency in insulin-treated subjects 155 a
 – is it a major problem? 154 a
The diabetic diet – 296 c
The diabetics' diet book 208 br
Thromboglobulin – response to insulin-induced hypoglycaemia 181 a
 – Type 1 diabetes – and glycaemic control 177 a
Thromboxane A2 production – and peripheral vascular disease 180 a
Timolol – treatment in diabetics after myocardial infarction 171 a
Tolbutamide – glucagon, somatostatin, and insulin secretion 156 a
Trestatin – a new alpha amylase inhibitor 202 a
Thyrotropin-releasing hormone – immunoreactivity in isolated pancreatic culture 183 a
 – growth hormone and somatostatin 151 a
- Triiodothyronine** – and glucose metabolism in diabetic and healthy man 143 a
Type 1 diabetes – a new animal model 207 a
 – association with 27 genetic markers 343
 – circulating immune complexes and thromboxane 142 a
 – cold test effects on clotting changes 178 a
 – immune modulatory effects of inosinplex 174 a
 – implanted insulin infusion device 78
 – newly diagnosed, T lymphocyte subsets 247
 – non-antigen parts of circulating immune complexes 143 a
 – not requiring insulin at diagnosis 392
 – one month prednisone treatment 180 a
 – prospective study of lymphocyte subsets 145 a
 – strict control and late complications 149 a
 – tubulin antibodies 202 a
 – two contrasting presentations 89
 – with older maternal age 82
Type 2 diabetes – 6-year history of diet treatment 160 a
 – effect of dietary protein on blood glucose 169 a
 – enzyme inducers – a new approach 195 a
- UK enquiry into the outcome of babies of diabetic mothers** 1979–80 177 a
Uric acid clearance – effect of induced glycosuria 198 a
Urine glucose estimation – unreliable indicator of diabetic control 144 a
- Vascular complications** – new Type 2 diabetics 201 a
Vascular permeability – diabetic rat heart 190 a
Vascular reactivity – newly diagnosed diabetic children 199 a
Vascular smooth muscle – and insulin action 169 a
Viral infection – and binding of insulin to mouse leucocytes 521
Virus – encephalomyocarditis – and changes in structure of islets 39
Vitamin D3 – calcium uptake 155 a
Very low density lipoprotein metabolism in non-ketotic diabetes mellitus 296 c
Xylose uptake – inhibition by cycloheximide – rat soleus muscle 429

Submission of a manuscript implies that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review or thesis), that it is not under consideration for publication elsewhere, that its publication has been approved by all the authors and by the responsible authorities – tacitly or explicitly – in the laboratories where the work was carried out and that, if accepted, it will not be published elsewhere in the same form, in either the same or another language, without the consent of the copyright holders. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform, electronic data-base, video-disks, or any other reproduction of similar nature, and translations.

Photographic reproduction, microform, electronic data-base, video-disks, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

The use of general descriptive names, trade names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of going to press, neither the authors nor the editors nor the publisher can accept legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special Regulations for the USA: Photocopies may be made for personal or internal use beyond that permitted by Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is \$0.20 per page or a minimum of \$1.00 if an article consists of less than five pages. Please pay this fee to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0012, volume, and first and last page numbers of each article copied.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Other Regulations: Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin, it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.
